Kit Assembly

Step by Step

Step 1.

Unpack the frame from the bag. Stand with backer side toward the floor. Stretch out the frame so it lays flat on the floor.

Step 2.

Lock the connecting arms into place. Stand the frame upright once all the connectors are securely snapped in the lock position.

Step 3.

Gather all the lighting strips and align so they are over each "X" of the frame, then pull the spring-loaded clip apart to fit onto the "X". Make sure the orientation of the male and female connectors allows for linking them together.

Step 4.

Connect the light strips in series for both top and bottom sides.

Kit Assembly

Step by Step

Step 5.

Connect the long extension cord to the female end of the top light strips in series. Run the long extension cord down the side.

Step 6.

First, attach the extension cord from the top row of lights to bottom row of lights.

Step 7.

Attach the light strip to the power supply. Then, attach the power cord to the power supply.

Plug in the power cord for test lighting.

Step 8.

Once the lights are all set, it is important to disconnect the power to the lights before applying the graphic. Lay the frame back down on the floor. Apply the graphic to the frame, the endcaps do not have to be immediately applied.

Kit Assembly

Step by Step

Step 9.

Stand the unit back to the upright position. Power On the lights and verify that they all work. Apply the end caps by wrapping them to the back side and velcro them closed.

Setup Complete.
